# Applications of Artificial Intelligence: Brainstorming Activity

Artificial intelligence (also known as AI) has the potential to handle or assist in many situations.

Part 1.  Working individually, think of some different possible or at least plausible applications.  Write down as many as you can in 3 minutes.

Part 2. Working in a group of two or three, go through all the applications listed by the members of your group in Part 1, and form a consensus list, prioritizing the applications by "importance in 5 years."   There should be at least 10 applications in this list.   For each entry, briefly indicate why it is so important.  Finally, put a * next to the application that is your personal favorite or desire.

Name(s) of your partner(s):  1. _____;  2: _____

Each student should turn in his or her copy of this worksheet, and it should contain both the individual list of applications and the group list of at least 10 applications, prioritized with most important first.
